Denmark Agricultural College is situated 2 km from the town of Denmark which is 400 km south of Perth.

The residential facility of the College provides secure, individual-room accommodation for 80 male and female students. It has a large state-of-the-art kitchen and dining room, catering for meals for the students. A modern recreational centre enables all-weather leisure activities.

The educational program is centered around an enterprise theme. Students regularly move between the class, design and technology centres and the farm.

The 560 hectare farm includes beef and dairy cattle, animals for meat and wool, production horticulture, plantation forestry, aquaculture and a vineyard encompassing viticulture and wine-making opportunities.

Denmark Agricultural College is a campus of the Western Australian College of Agriculture.
