**A great place to live**

**A great place to learn**

A home away from home for students the Esperance Residential College offers the opportunity for your child to board in a happy and safe environment with a positive atmosphere, complimented by professional, supportive and committed staff whose goal is to encourage your child through their secondary schooling and beyond.

As well as housing TEE and TAFE students, the College provides accommodation for up to 100 students, separating boys from girls in four bed, two bed and single bedrooms. The College has video surveillance in the student dormitories, modern fire system linked to the local fire brigade and staff providing 24 hour care 7 days a week.

Study rooms are equipped with computers (students have after hour's access to the internet/email facilities at the Esperance Community College) and specialised subject tutoring is available.

Students are also able to relax and enjoy the great social life that the College has to offer. There is a recreation shed for indoor sports, which also boasts a gym, craft rooms and skateboard ramps, state of the art entertainment systems, four TV rooms, specialised music rooms, a pool table, table tennis and use of interactive games.

College students participate in community sports and are encouraged to be involved in College activities

such as horse riding. Facilities are provided for students to even bring in their own horses. Other activities include surfing, sand boarding, use of the Esperance Leisure Centre and various weekend day trips and camps.

Esperance Regional College, Esperance Senior High School, Curtin University and the Esperance Community College are situated closely together and have combined resources to advance your child's education. Collectively they are recognised by the partnership called the Esperance Community Educational Campus.

The Esperance Residential College teaches your child the benefits of maturity and responsibility for themselves and others and encourages them to pursue goals to successfully advance their secondary education, thus further preparing them for post-secondary studies and/or work force integration.
